

e-Medsys EHR and Gastroenterology: Making EHR Easy to Digest!

Your Gastroenterology practice needs to track very specific procedures and the medical problems presented by your patients, and **PracticeOne** presents the solution: **e-Medsys EHR**.

With Gastroenterology-specific features and capabilities, **e-Medsys EHR** will help to reduce paperwork, files, redundancy and more.

Templates specific to Gastroenterology provides quick means of capturing the entire patient encounter electronically: Family History, Assessment and Treatment plans, Lab Reports, the Review of Systems (ROS), Images, Medications and Prescription Management, Letters, and more are all features built into **e-Medsys EHR**.

Specific to Gastroenterology, the system will track data on all information relating to the **abdomen, hepatomegaly, colonoscopies and other gastroenterology-related tests, bowels sounds, rectal problems, surgery reports**, and more.

Supporting **Voice and Handwriting Recognition**, **e-Medsys EHR** allows the Gastroenterologist to enter transcribed notes directly into the patient's record, eliminating costly transcription and wait-times often associated with an outside service.

Handwriting gives the physician the ability to make **handwritten notes, sketches and drawings** exactly as they would usually have been done on paper, but instead directly into the patient's record, eliminating the paper.

Because **e-Medsys EHR** has a built-in **electronic superbill**, diagnoses, procedures and their fees are automatically entered during the encounter into the **e-Medsys PM** system for quick billing. When the patient stops at the front desk before leaving, the data has already been input into the system, eliminating the need for front desk staff to post manually from a paper superbill.

At the same time, our own patented **E / M Coder** (also an **e-Medsys EHR** built-in feature) ensures that the correct and maximized Gastroenterology coding is used, that the possibility of undercoding and overcoding is eliminated, and that optimum reimbursement is obtained.

On the **Prescription Management** side and *directly through the patient's record* in the **e-Medsys EHR**, the Gastroenterologist can select medications based on **formularies** and have prescriptions **sent electronically directly to the patient's pharmacy**. Issuing **refills** is done with one or two mouse clicks.

e-Medsys EHR's Prescription Management will issue alerts on **allergies, interactions and expirations**. It also tracks medications prescribed to patients, making it easy to **identify groups of patients to whom certain medications were prescribed**, should that ever be needed.

The Gastroenterologist can order **lab tests** *directly through the patient's record* in the **e-Medsys EHR** via our interface with several major labs. Results of those tests come back from the lab and go *directly back into the patient's e-Medsys EHR record*, thus automating this entire (and very tedious) process.

The practice is **alerted when lab results come back**, and with *special notations on abnormalities*.

How does all of this really help the Gastroenterology practice? Read what **Iris Garman, Practice Administrator for Pennsylvania GI Consultants in Camp Hill, PA** has to say:

“The **e-Medsys EHR** has virtually transformed our practice from being laden with paper and charts to being automated and efficient. Prescriptions, labs, consult letters, encounters...it’s all automated and clean. We love how diagnoses and procedures are posted directly from the encounter. Our front desk staff does not have to deal with paper superbills and manual posting. “

Iris goes on to talk about **PracticeOne**. “They are a great company, very responsive and caring. The implementation and training went more smoothly than anyone here could have imagined. We were using **e-Medsys EHR** quickly...it was not a long, drawn-out process.”

Take the gut-wrenching experience of tracking your patients’ clinical and medical data now, and turn it into a streamlined, efficient and simplified experience!

Contact **PracticeOne** at **877-363-3797, Extension 2922** to schedule an overview of our e-Medsys EHR. See for yourself how our solutions can help to *your* Gastroenterology practice.
